

## LOCAL INTELLIGENCE.

**BROKE LOCKS.**—John King was arrested last Sunday night by Constable Turner, assisted by Eugene Blair, for making threatening demonstrations against J. O. McCormick and otherwise acting in a rough and disorderly manner. He was taken to the county jail and locked up. King, since his examination on the charge of assault against John Driscoll, has been walking at large on bonds. Three of his bondsmen hearing of his conduct on Sunday night, on Monday morning at 10 o'clock notified the County Clerk and Sheriff in writing that they delivered King over to the Sheriff and were no longer responsible on his bonds. In addition to this they also gave notice to the same effect to Deputy Sheriff Henderson and Jailor Tom Tilley, who stated that it was all correct, they would hold King. At four o'clock in the afternoon King was found to have escaped by digging a hole through the wall of the jail with a piece of broken stove. He had probably been gone half an hour before his escape was discovered. Tilley says he looked into the jail at three o'clock and that King was in there then. The country was accused but no trace of King was found.

**COUNTY COMMISSIONERS.**—The Board of County Commissioners held their regular monthly meeting on Monday, June 3d, and transacted the following business: The petition of Margaret Dooley, indigent sick, was presented, read and taken under advisement. Bill of Floral Springs Water Company for repairs to water-pipe laid over. The following bills were presented and allowed: V. Weaver, book case for R-order, \$90; Record Pub. Co. printing, \$32.50; R. P. Dayton, making mining assessment, quarter ending March 31st, \$160; E. Lawson, meat furnished Kavanagh, \$27.50; D. C. Clark, merchandise furnished Kavanagh, \$6.50; Thomas Tilley, waiting on Crawford, \$105; W. L. McKee, attending Court, etc., \$231; A. B. & W. J. O'Dougherty, legal services in regard to payment of delinquent taxes, \$50; U. E. Allen, fees, \$43.75; Le Count Bros., stationery, \$205.55. The Board adjourned.

**CHANGE SCARCE.**—Since the passage of the Silver bill silver has become very scarce, and it is after doing considerable running around that a person succeeds in getting a "twenty" changed, and we expect our brokers will soon be charging a premium on silver. The opponents of the Silver bill used to say that if the bill was passed it would drive all the gold out of the country, but it has acted just the reverse in Picoche and has driven all of the silver out. The Mormon hucksters have gobbled up all the silver and small gold and peddled it off to the land of Zion, making it difficult in procuring change. If Uncle Sam will ship a couple of thousands of the "dollars of our daddies" in this direction, to be used as change, he will secure the heartfelt thanks of this community.

**LEO MASHED.**—On Sunday last an Indian, while attempting to get from one of the ore cars to the caboose car while the train was in motion, slipped and fell so that the cars dragged—with out running over him for some distance. The train was stopped and poor Leo taken from between the cars and a messenger sent to town for a doctor. On his arrival he found the Indian's right leg badly mangled and some very severe scalp wounds. These were attended to and the Indian removed to the old hospital, where he has since been attended daily by the doctor, who states that he will recover.

**TO BE MARRIED.**—We learn that an ex-Picoche belle, now living at her home in Rockville, Utah, is about to take a trip to St. George, go through the Temple, and be married in good old Mormon style. We know this news will be the cause of bursting several young Picoche hearts, and very probably we will have a couple of cases of suicides to chronicle in our next issue.

**ACCIDENT.**—On Saturday last a rock about the size of a man's fist fell down fifty feet of Meadow Valley shaft No. 3, striking one of the workmen a glancing blow on the head with such force that it knocked him senseless. A severe scalp wound was the result. Had the force of the rock struck him full on the head it would have brained him.

**EL DONADO CANYON.**—Byron Sykes and A. O. Wilcox arrived from El Dorado Canyon last Sunday afternoon. They left the canyon on Sunday, May 26th, at which time the thermometer showed 100 degrees. The mill was running when they left and affairs seemed to be working along smoothly.

**HARDWARE.**—G. W. Fish has just received a large stock of iron, steel, tinware, agricultural implements, stoves, door and windows and house-furnishing goods, which he offers at prices to suit the times. Mill and mining supplies always on hand. For particulars read advertisement.

**SCHOOL TAX.**—The vote on the tax for the benefit of the Public Schools will come off next Saturday, the 15th instant. It is to be hoped that our citizens will cheerfully vote for a payment of this tax.

Advertise and grow rich.

**LATE RECEIPTS AT FOUGADE'S.**  
Choicest Natural Leaf Japan Tea in jars.  
Pipes and Smokers Articles.  
Solar Salt.  
Sugar of Lemon.

## OUR MINES.

RAYMOND AND ELY.

Considerable progress has been made during the last week in work relating to air compressor. In the hoisting-works the foundation for the compressor was completed and finished off, pipes have been laid along the lower level and one of the receivers is now receiving the attention of the hands at the machinestop. The compressor and balance of material was shipped from York, Utah, on the 20th of May, so that it may be expected at any moment. Good progress has been made in fixing the station where the winze is sunk. Ore is coming up pretty rapidly from the upper levels of this mine, and is of good quality. Over 15 tons daily are being hoisted. The ore mills well. To a person going from the town up to the Raymond & Ely works quite a contrast is shown in the busy scene presented there and the comparatively dull one in town.

## HILLSIDE.

The road to this mine and furnace is finished and the work of hauling ore commenced yesterday. The mine still continues showing up in good condition and when ready to receive at the furnace will commence taking out a large quantity of ore. Are now taking out 14 tons daily from the top out. This is being extracted at present for the purpose of enabling the men to keep on work. The only thing that will prevent the furnace starting by the 20th will be the coal men not filling their contracts in time.

## DAY.

The sinking of the winze is stopped; the other work in the mine is going on as usual. Where the winze was stopped, at the bottom, are drifting in a southeast course, with very good indication, the impression being that the ore lies in that direction. The ore stops 20 feet below the level of the tunnel are improving, the quality of the ore is also getting better.

**FROM SILVER REEF.**—Several parties came from Silver Reef lately on a visit to Picoche, and from them we learn that affairs at the Reef are pretty lively and that faro and other gambling games exhibit the effect of lively times; but still, as is usual in camps newly started and doing well, everything is getting to be overdone; too many business men are going there and starting business, too many miners and workmen going there according to the demand for them, the consequences being that there are a large number of men hanging around idle and many leaving on foot. From comparison with the pay-rolls of the companies in Picoche and Silver Reef we learn that more men are at work at present in Picoche than at Silver Reef.

**PERSONAL.**—Rev. S. P. Kelly, Superintendent of Public Instruction, arrived here last Sunday. During his stay he was engaged in inspecting the Public Schools of this county. We understand that Mr. Kelly intends being a candidate for the position he now holds in the coming campaign this Fall. Captain H. S. Lubbock, Superintendent of the Christy Mill & Mining Company at Silver Reef, arrived in town Sunday. Louis Janin took his departure for San Francisco Tuesday, after inspecting the mines of Pennsylvania District.

**FOR EUROPE.**—Adolph Cohn left last Wednesday morning for Virginia City, where he goes as a representative of Keystone Chapter No. 6, F. A. and M., and also of St. John's lodge No. 18, F. A. and M., of Picoche, to the Grand Lodges to meet in Virginia from the 9th to the 14th of this month. From Virginia City he goes East, thence to Europe, takes in the Paris Exposition, and from there to the home of his parents. Adolph is uncertain whether he will return to this country or not. We wish him good luck wherever fate casts his steps.

**WILL REPORT.**—J. W. Musser arrived in Picoche Tuesday evening. Since his arrival he has been making an examination into the affairs of the Alps Company, its resources, etc., and will in a short time inform the creditors of that company when they will be paid. He has visited the mill and mines of the company, making a thorough inspection.

**CHANGE OF DIRECTION.**—For the present no bullion will be shipped from Silver Reef by way of Picoche, the orders now being to ship it by way of Salt Lake City. Mill men at the Reef are growling at this way of shipping as it entails more expense.

**FRESH CANDY.**—D. J. Krause has just received a large assortment of candy fresh from the Chicago factories; also various kinds of chewing gum. A large supply of cigars and Yankee notions were likewise received at the same establishment and are offered for sale at bed-rock prices.

**NEW FOREMAN.**—Last Saturday Billy Trowbridge took charge of the Alps Company's mines as Foreman, succeeding to the position made vacant by the resignation of F. J. Cullen. Billy is the right man in the right place.

**WINES AND LIQUORS.**—Johnny Lynch was busily engaged during the fore part of the week in filling his warehouse with a large supply of the finest kinds of wines, liquors and cigars that had just arrived.

**FOR ROCK CREEK.**—P. J. Cullen, late Foreman of the Alps Company, left on Monday last for Rock Creek, near Tucacora, to take charge of some mines in that district.

The District Court meets on Monday next. All juriesmen summoned are expected to be on hand as that is the day for which they were subpoenaed.

**SAUR KRAUT VS. NIGGERHEAD.**—Every one knows Mike Fortie, the colored man who left for the East in the early part of the week, who was employed around the State Bank. Mike seeing a German friend of ours planting seed in boxes of prepared earth, stepped up to him and said: "What you plant thar; is it saur kraut?" "No," replied the German; "I'm planting Niggerhead." Mike scratched his head for a minute, then turned away, debating with himself whether he had got the worst of the little joke.

**A CLOSE CALL.**—An individual, suffering under the influence of the remedy for snake bites, became very belligerent yesterday morning, and while in this condition hauled out his pistol, flourished it a round, and in replacing it back in its scabbard, it was accidentally discharged, the ball coursing down the leg of the owner of the pistol, scorching it a little, but doing no further damage. The young man was locked up until he recovers his senses.

**DELINQUENT TAXES.**—The County Commissioners again passed their regular monthly meeting without ordering any suits for delinquent taxes, and we think they have acted wisely in the matter, as on enquiry at the offices of the Treasurer and Recorder we learn that the delinquents are paying up in a faster style than the money could have been gotten from them if suit had been commenced.

**DRY VALLEY MILL.**—This mill is now doing some good work in working the tailings of the company. They are being worked so close that a profit of \$5 per ton over all expenses is made. The mill is turning out about \$16,000 per month in bullion from these tailings, generally about two bars per week. A bar came up yesterday valued at \$1,632.

**CHRISTY BULLION.**—The Christy Mill & Mining Company shipped from Silver Reef May 31st one bar, valued at \$891.58. This was the last shipment on May account. The total shipments for May amounted to \$25,910.58. The company shipped on the 4th instant one bar, valued at \$1,602.59.

**"LIZZARD."**—This animal made his appearance on our streets last Sunday, having been ridden from Silver Reef by K. J. Hanly, who departed with him last Monday for Eureka, going there for the purpose of looking out for the interests of "Ray John" in the races to come off at that place.

**MR. J. PACHE,** agent for Shea, Boqueraz & McKee, liquor merchants at San Francisco, arrived here during the week and departed for Silver Reef yesterday. He will return to the Bay by way of Salt Lake. Captain Lubbock re-turned to the Reef in the same stage.

**REDEMPTION.**—Holders of certificates of indebtedness of Lincoln county secured prior to the 1st of April, A. D. 1878, will find published to-day a notice that there is now \$1,000 in the Redemption Fund and that bids will be received for that money up to the 23d instant.

**PEOPLE'S MARKET.**—Loomis & Adelman, proprietors of this market, are using their utmost endeavors to supply first-class cuts of beef, veal and mutton to families who patronize them. A large supply of desirable meats always to be found on hand. Give them a call.

**SURPRISE PARTY.**—A surprise party took place on Thursday evening at the residence of Mrs. S. H. Carman, Lacour street. The entertainment consisted of dancing and games, keeping up till a late hour. The music on the occasion was excellent.

**TEM-PAHUTE.**—We learned from the Hiko mail rider that a large lot of ore is being shipped over to Revelle, the nearest point, from Tem-Pahute, to be milled at that place. About thirty men are working and prospecting at Tem-Pahute.

**CHRISTENING.**—A christening took place Wednesday evening, the ceremony being performed on the child of Lizzie Miller by the Rev. S. P. Kelly, the child being christened Matt Henry Miller.

**SOLAR SALT.**—T. C. Ponjade advertises that he is sole agent of the Solar Salt Company of Egan, and will supply the trade in quantities to suit. For particulars read advertisement.

**PRESS WARD** returned home Thursday evening. On account of sickness he had to lay over at Shales' station two days.

**PICOHE BULLION.**—\$15,230.78 in bullion was shipped during the week, according to reports of Superintendents.

**A HEAT.**—A heat, consisting of 15,000 pounds of iron, will be taken off at the Raymond & Ely foundry to-day.

**"BETTER AS GOOD."**—Direct importation—A carload of Ph. Best's Milwaukee Lager Beer, pronounced by connoisseurs the best Table Beer on the Continent. Families supplied at 50 cts. per bottle—\$5.50 per dozen. Also A. A. Bourbon, Fine Brandy, etc., together with full assortment of all the concomitants usually found in a first-class Bar. Olgars a specialty, at

PANAMA CIGARS, No. 1000 Main St. One Price! One Bit!

CALIFORNIA GOLD JEWELRY sold at the Golden Rule store, and old jewelry taken in exchange.

FINE Chicago Confectionary, Stationery, Cutlery and a Circulating Library at Krause's.

FRESH GARDEN SEEDS at G. R. Alexander's.

**THE EARTH NOT A TRUE GLOBE.**—Our planet is not a true globe, because of its former plastic condition before the formation and cooling off the surface. When the globe was soft it was more or less yielding, and then the rotation of the earth to which I have referred tended to drive off, as it were, the matter in the equatorial regions; so that the distance through the center of the earth between the two sun faces as far as possible removed from the poles of rotation, or those parts of the earth which the imaginary axis comes through is rather greater than the distance between the points where the axis come to the surface. The reason of that fact, and that it must have been so, has been beautifully established by several experiments. That the earth was once hotter than it is now is therefore proved, both by the irregularities of its surface, and by its shape as a whole. We must not imagine, however, that there has been but one change. The minor irregularities are all gradually changing by inner energies and the action of air and water, and it may be that even the largest ones are young, compared with the age of planet's surface. Nor does the change end here; the equatorial protuberance itself may but after all mark a point in a great circle of change, which has compelled the earth to rotate now about one axis and now about another. Mathematicians consider it highly probable that the axis of the earth may have been in ancient times very differently situated to what it is at present, and, indeed, that "it might have gradually shifted through 10, 20, 30, 40, or more degrees, without at any time any perceptible sudden disturbance of either land or water." Thus it appears that nature prevents catastrophes by the very hugeness of the scale on which she works.—[Norman Lockyear in Good Works.

Paris letter: Did I ever tell you the story of young Mr. Jessie Grant which amused London for an hour or two last Summer? Mr. Jessie Grant was present, as he often was, at a great party in a great London house, and found it dull. Complaining to a friend that the entertainment did not meet his views, he was reminded that it was open to him to go away. "Yes," responded the young hopeful, "I know that, but you see I don't want to break up the party so early."

Rochester Democrat: They tell a very good story on a deacon in a neighboring town. He thought he recognized a young lady friend leading a little boy up the street, and stepping to her side, he asked: "Why, Mary, where did you get that child?" The scarlet face instantly turned to his was that of an entire stranger, and her quick reply fully satisfied him. "I came by it honestly," was all she said, and the good old man had something to think about all the way home to dinner.

The Bennett-May duel is at length described. Only Bennett, May and the two Seconds were present two physicians, however, being near by. The word was given. May fired, but Bennett's cap snapped. Bennett claimed the right to fire, which, after some demurrer, was accorded to him. He then fired in the air. The parties touched hands, and the affair was over, May, being the challenged party had originally chosen sabers, but Bennett's friends refused to accept this arrangement, and May then named pistols.

Stockton Independent: A widow in Armstrong county, Pa., bought a husband paying \$20,000 for him, and a few days after the bargain the miserable fellow went off with the money and some other valuables belonging to his wife and the neighbors. The Philadelphia Times chides the lady for her lack of wisdom in paying so much for one man, and a cheap one at that, when she might have purchased half of the Pennsylvania Legislature for the money.

An enterprising Brooklyn sexton, having introduced the father of a young man to the mother of a young woman and thus contributed to bringing about the marriage of the young people, got \$30 from the old gentleman for securing a wife portioned with \$2500 for his son, and tried to get \$75 from the old lady for getting a husband for her daughter. When he went into Court, he was nonsuited of course.

Philadelphia Day: When two colored clergymen are cheered in the General Conference of the Methodist Episcopal Church South, the time ought not to be very distant when the American Methodist Church will be again united. It certainly shows that the issue upon which they separated is dead, and that it is foolish to any longer maintain separate organizations.

The Boston Journal gives this remedy for the currant worm, which has been such a pest for several years: Three spoonful of hellebore dissolved in a common pailful of water, put on the bushes with a syringe, will send all the worms out of this world, if not to perdition, without causing any harm to either bush or currant.

Henry Ward Beecher is coming! Ladies of the maiden gender prepare to pucker! Ladies of the married persuasion, prepare to guard the temple of honor! F. S.—Mrs. H. W. B. accompanies her husband. The country is safe.—[S. F. Stock Exchange.

Con.: Why is the attempted resurrection of Sammy Tilden like a pauper graveyard? Because it is Potter's Field.

The Sierra Fume and Lumber Company makes 40,000,000 feet of lumber annually.

When Beecher gets on horseback, who knows where he will ride?

England receives annually about 4,000,000 cigars from America.

"Hop older" is what they call it down in Maine, now.
